3. HAZARDS IDENTIFICATION

Emergency Overview

Inhalation of vapor or mist may cause nasal,throat or long irritation. Inhalation of large amounts of respirable particles maybe toxic to the lungs. Symptoms maybe modest initially, follow in hours by severe shortness of breath requiring prompt medical attention. Repeated or prolonged inhalation exposure may cause central nervous system depression with dizziness,confusion,incoodination,drowsiness or unconsciousness. Gross overexposure may cause fatality.

Potential Health Effects

Skin : May cause: slight irritation, Redness.

Eyes : May cause eye irritation. Discomfort, tearing, Blurred vision.

Carcinogenicity

1,4-Dioxane is listed by IARC, NTP, or OSHA, as a carcinogen.

4. FIRST AID MEASURES

First Aid

INGESTION

Never give anything by mouth to an unconscious person. DO NOT induce vomiting unless directed to do so by a physician or poison control center.

INHALATION

Move to fresh air in case of accidental inhalation of fumes from overheating or combustion.

SKIN CONTACT

In case of contact, wash with water and soap as a precaution.

EYE CONTACT

In case of contact, rinse with plenty of water. If eye irritation persists, consult a specialist.

General advice, when symptoms persist or in all cases of doubt seek medical advice.

Fire Fighting Instructions

Wear self-contained breathing apparatus (SCBA). Wear suitable protective equipment.

Standard procedure for chemical fires.

6. ACCIDENTAL RELEASE MEASURES

Spill Clean Up

Shovel into suitable container for disposal.

Accidental Release Measures

Prevent material from entering sewers, waterways, or low areas.

7. HANDLING AND STORAGE

Handling (Personnel)

Avoid breathing vapors or mist from overheated material. Avoid contact with eyes, skins, clothing. Wash thoroughly after handling. Do not store or consume food, drink or tobacco in areas where they may become contaminated with this material. Avoid circumstances that produce respirable particles unless suitable ventilation and respirator are used.

Storage

Store in well ventilated place. Keep container closed to prevent contamination. Freezing will affect physical condition but will not damage.

Thaw and mix before using, keep away from open flames and heated surfaces above 200 deg C (392 deg F).

8. EXPOSURE CONTROLS/PERSONAL PROTECTION

Engineering controls

In the event that the polymer is heated above 200° C (392° F), local ventilation should be used to avoid exposure to fumes.

Personal protective equipment

Respiratory: No personal respiratory protective equipment normally required. In the case of hazardous fumes caused by overheating, wear self-contained breathing apparatus.

Hand: Additional protection: No particular glove type is recommended, but nitrile may used.

Eyes: Chemical safety goggles.

Skin and body protection : No PPE is specified however, avoid contact with skin, eyes, and clothing. Preventive skin protection.
