

Gemini[®] Fluoro Surfactant for Paper BH-71P

Introduction:

BH-71P is water-soluble anionic surfactant for paper. It can treat all kinds of packaging paper and industrial paper enabling better water and oil repellency. It is compatible with other anionic paints and sizing agents.

BH-71P is low foam、fast penetration、easy to treat. It can spray on paper or add into paper pulp.

Typical Properties:

Ingredient	—	fluorinated Copolymer
Appearance	—	Light yellow liquid
Solid	wt%	20
Flash Point (closed cup)	°C	No Flash Point
Freezing Point	°C	≤0
Density (25 °C)	g/cm ³	1.05~1.10
Solubility		Soluble in Water

Application:

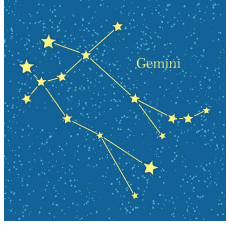

Suggested use rates are 1~3% wt solid, make adjustment according to your own recipe

Dilute with water before use.

Attentions:

- . BH-71P can NOT use in environment of pH > 8
- . During processing, wear protection clothes, be careful of eye、skin contact.
- . Keep the container sealed and store in cool、well ventilated locations.
- . It will have flocculating sediments in low temperature, no worries, please warm up with 40°C hot water and mix well before use.

Packaging/Transport: 25Kg plastic jug. Not classified as dangerous in the meaning of transport regulations.
